

SUBHASISH GOSWAMI

Senior Manager, Product | Fintech, Payments & AI Decisioning | Platform & Growth

Bengaluru, India • +91 97428 25482 • subhasishgoswami02@gmail.com • linkedin.com/in/subhasishgoswami • github.com/subhasishgoswami02

~10x	5 PODs	98%	<10 sec
Origination growth achieved across tenure, 2021 to 2025	~50 professionals across 2 business lines; P&L accountable	Containment rate on Mira, our production AI assistant	Decisioning latency, from a 48-hour manual queue

SUMMARY

Product leader with 14 years building and scaling technology platforms, including 6.5 years in regulated fintech at MPOWER Financing, now acting product head across International Student Lending and US Domestic Lending. Accountable for P&L outcomes and the overall success of 5 PODs (~50 professionals), presenting product strategy directly to CEO, CFO, and CTO in recurring Product Co reviews. Scaled annual origination ~10x while marketing spend was cut about 80%, built and launched a new product line from a \$14B market gap, and shipped two AI products to production. Products owned: borrower acquisition, onboarding, KYC and identity, underwriting, configurable decisioning, risk-based pricing, payment and disbursement flows, partner and bank APIs, servicing, referral growth, AI-powered borrower support, and internal operations automation.

CORE COMPETENCIES

Product Leadership & Team	P&L Accountability, POD-Level Value Delivery, RICE Prioritization, Design & UX Partnership, 0-to-1 Launches, Executive Stakeholder Management
Technical & Systems Thinking	API Contract Design, System Architecture Decisions, Engineering Collaboration, Configurable Rules Engines, Technical Risk Assessment
Discovery & Growth	Customer Discovery, NPS & CSAT, Customer Journey Mapping, Funnel Optimization, Referral & Growth Platform, Competitive Analysis
AI & Decisioning	Agentic AI, GenAI Product Strategy, RAG, Applied ML in Credit, Configurable Decisioning Engines, LLM Evaluation & Red-Teaming, Responsible AI

EXPERIENCE

MPOWER FINANCING

Dec 2019 to Present

Senior Manager, Product

- Employee #20 in India. Built the product and decisioning platform solo from 2019, then scaled into accountability for 5 PODs (~50 professionals). Acting product head for International Student Lending and US Domestic Lending since 2026, accountable for P&L outcomes, reporting directly to the CTO.
- **Accountable for P&L outcomes across 5 PODs (~50 professionals), spanning two lending business lines.** Translated origination and business targets into roadmap, prioritization, and execution plans for each POD's PMs, project managers, tech leads, engineers, and QA. Presented product strategy and performance directly to CEO, CFO, and CTO in recurring Product Co reviews, and to Ops and Credit Risk leadership in Ops Co reviews.
 - **Led the product decisions behind ~10x volume growth, without proportional spend.** Scaled annual origination volume from ~\$35M (2021) to ~\$350M in 2025, across ~25,000 funded loans and ~\$550M cumulatively disbursed. Sales and marketing spend was cut about 80% in 2025 even as volume rose.
 - **Spotted a \$14B annual market gap when a federal policy change eliminated a major lending category, leaving a \$5-6B segment of US-citizen borrowers with no alternative.** Co-launched a new product for this fundamentally different borrower profile, customizing the underwriting logic and application experience (US citizens do not have the same documentation or credit-history path as international students) while reusing the core decisioning and servicing infrastructure. Onboarding cut from 35 documents to 9.
 - **Onboarding drop-off fell from 16% to 4% after direct customer research found the failure point.** Ran hypothesis-driven experiments on prefill, personalization, and application path with design. Completion rose from 70% to 82%, pre-approval conversion from 59% to 76%.
 - **Built the business case for referral as an underused acquisition channel, then designed and shipped the growth platform.** Referrer dashboard, reward tracking, gamified engagement, and referral visibility embedded in the borrower dashboard. Targeted a 20% lift in sharing rate and 15% lift in referee applications.

- **Built the product strategy and spec for a configurable decisioning platform processing 27,000+ monthly applications.** Redesigned loan decisioning from a 48-hour manual queue into sub-ten-second automated processing. Shipped as a reusable engine spanning 3 product lines and 5 pricing tiers, cutting new-product onboarding about 60% while tripling throughput.
- **Reduced single-bank funding concentration risk by bringing a second originating bank online.** Designed a routing engine covering round-robin, capacity-based, and concentration-limit allocation, assigned by lender code at application creation. Coordinated sign-off across 11 stakeholder functions including compliance, capital markets, and servicing, resolving edge cases like repeat-borrower routing and disbursement continuity.
- **Overhauled how the company buys credit data: a \$1.41M annual spend audit found 40% of bureau pulls happening before document completion.** Won 10-function sign-off for a documents-first strategy worth **\$275K/year**, part of ~\$350K/year in total data and vendor savings. Built a credit upload product extending coverage from 18 to 190+ countries.
- **Mira, our RAG-based AI borrower support assistant, reached a 98% containment rate serving 47,311 users without human handoff.** Owned product strategy, grounding and guardrail requirements, evaluation metrics, and testing roadmap. Red-teamed hallucination and grounding failures before any user touched it.
- **Defined the MVP roadmap for AI servicing agents covering delinquency, contactability, next-best-action, promise-to-pay, and human escalation workflows.** Success metrics designed across cure rate, roll rate, contact rate, recovery rate, and manual-effort reduction. Engineering build in planning phase.
- **Built ML-driven risk pricing models that changed production credit decisions.** Salary-potential modeling and risk-based pricing lifted approved amounts **13 to 17%** and approval rate about 4 points across MBA, STEM, and medical cohorts without loosening credit quality.
- **Built the automation covering the loan deferral workflow, scaling ops capacity without added headcount.** Automated **99%+** of the workflow, saving **1,200+** ops hours. Alongside: 75%+ automated identity verification, 40%+ no-touch processing.

EARLIER EXPERIENCE

Full-time MBA at Great Lakes Institute of Management (2014 to 2015) sits between the Wipro and Cognizant roles below, closing the timeline gap.

TIETOEVRY, Senior Business Analyst / Product Manager 2018 to 2019
Led requirements and Agile delivery for a workflow-automation program; delivered an Azure Logic Apps proof of concept replacing manual email-approval workflows; designed a virtual assistant on AWS Lex.

COGNIZANT BUSINESS CONSULTING, Business Analyst / Consultant 2015 to 2018
Led proof-of-concept and solution work across automation, AI, and emerging tech for banking and financial-services clients; won four new client engagements through proposal and solution work.

WIPRO TECHNOLOGIES, Associate Consultant 2011 to 2014
Delivered claims-processing and policy-administration platform work for major US insurance clients. Separately supported business process configuration, Siebel CRM workflows, and cloud migration for a separate enterprise client spanning insurance, media & communications, and retail, including a retail website-purchase flow.

SKILLS & TOOLS

Product & Delivery	PRDs, BRDs, User Stories, Acceptance Criteria, RICE Prioritization, Roadmap Ownership, Agile, Scrum, Release Planning, Go-to-Market, Hiring & Mentoring PMs
Design & UX Collaboration	Rapid MVP Prototyping (Replit, Claude Code), Wireframe & Prototype Review, Design System Alignment, Usability Testing, Customer Journey Mapping, Figma
Analytics & Research	SQL, Tableau, GA4, Pendo, FullStory, A/B Testing, Cohort Analysis, Sentiment Analysis, NPS & CSAT, Segmentation, Hypothesis-Driven Experimentation
AI, GenAI & Agentic	Agentic AI & AI Agents, GenAI Product Strategy, RAG (Retrieval-Augmented Generation), LLM Evaluation & Red-Teaming, Prompt Engineering, Guardrails & Grounding, Applied ML, AI Governance
Platform & APIs	API Products & Contract Design, Data Schemas, Partner Integrations, Workflow Automation, System Design
Credit & Identity Data	Nova Credit, TransUnion, Plaid, Veriff (bureau, bank-data & KYC integrations)
Software & Tools	Salesforce, JIRA, Confluence, Postman, Azure DevOps, Claude, Cursor, n8n (working familiarity)

EDUCATION & CREDENTIALS

MBA (PGPM), Finance & Business Analytics	Great Lakes Institute of Management, Chennai	2014 to 2015
B.Tech, Electronics & Instrumentation Engineering	Haldia Institute of Technology	2007 to 2011
AI Product Management Certificate	ProductFaculty / Maven	2025
