

Subhasish Goswami

Product Leader | Lending, Credit Decisioning and Applied AI

Bengaluru, India | subhasishgoswami02@gmail.com | linkedin.com/in/subhasishgoswami | Portfolio: subhasishgoswami02.github.io

SUMMARY

Product leader with 14 years in technology platforms, seven building MPOWER Financing, a regulated fintech lender, from the ground up as employee #20 in India. Took credit decisioning from a 48-hour queue to under 10 seconds, scaled originations roughly 10x to about \$350M, and shipped a production AI assistant and an agentic servicing architecture. Was acting product head for International Student Lending and US Domestic Lending from April 2026, accountable for P&L outcomes across 5 PODs with five Product Managers reporting in.

48hr to under 10 seconds credit decisioning, 3x throughput | ~10x origination growth, 2021 to 2025 | 98% containment, AI assistant across 35,277 users | \$43M incremental funded volume from risk-based pricing

EXPERIENCE

MPOWER Financing

Senior Manager, Product | Bengaluru, India | Dec 2019 to Sep 2026

Reported to the CTO | Led five Product Managers across 5 PODs, about 50 people spanning product, engineering and QA | ~\$350M annual originations

Joined MPOWER as employee #20 in India and built the product and decisioning platform from the ground up. Promoted four times to Senior Manager, Product, and was acting product head for International Student Lending and US Domestic Lending from April 2026.

PLATFORM, DECISIONING AND CREDIT RISK

- Rebuilt underwriting as a configurable rules platform inside Salesforce, the system of record for the loan lifecycle, taking automated credit decisions from a 48-hour manual queue to under 10 seconds and tripling throughput with no added review headcount.
- Productized risk-based pricing across five tiers, lifting approved loan amounts 13 to 17% and approval conversion 10 points with no cohort degradation, contributing **\$43M of incremental funded volume**.
- Automated underwriting document work (identity verification, admission-letter extraction with fuzzy matching for international names, geocoded address checks), reaching about **75% automated verification** on the straight-through path.

PAYMENTS AND PARTNER PLATFORM

- Led a cross-border payments migration for Canadian loan repayments onto a new processor (consent, bank-account maintenance, weekly payment files, auto-deactivation after failed debits), built against Payments Canada Rule H1.
- Owned configuration and admin APIs for a multi-tenant, embeddable B2B partner platform so each new partner launch reused one product experience through self-serve configuration.

APPLIED AND AGENTIC AI

- Shipped a production AI borrower-support assistant end to end, reaching **98% containment across 35,277 users**, and raised audited answer accuracy from 73.8% to 85.9% after red-teaming caught invented executive names; made grounding plus negative-scenario and compliance testing a standing release gate.
- Designed an agentic AI system for loan servicing (delinquency, contactability, next-best-action, promise-to-pay) under a supervisor that decides what escalates to a human.

GROWTH, NEW MARKETS AND LEADERSHIP

- Diagnosed application drop-off with GA4, PostHog and A/B testing, taking start-to-submit completion to **92%**, and localized for South Asia, Chinese and Spanish markets to lift organic conversion from **8.6% to 19.4%**.

- Launched a new graduate-lending product into a multi-billion-dollar segment gap, reaching **\$10M in approved applications** within two months by reusing underwriting and servicing and cutting required documents from 35 to 9.
- Converted a capital-markets funding pause into a live, reversible credit policy in two weeks and owned lender-facing reporting across a **\$178M+ pipeline**; chaired quarterly planning and presented the consolidated roadmap to the CEO, CFO and CTO.

EARLIER EXPERIENCE

TietoEVERY

Product Owner | Dec 2018 to Dec 2019

- Owned product requirements for B2B asset-management software; turned a manual email-approval workflow into a funded automation workstream and designed a conversational assistant for first-line query handling.

Cognizant Business Consulting

Consultant / Business Analyst | May 2015 to Nov 2018

- Led RFP/RFI responses and capability assessments for insurance and banking clients; won **\$0.42M in new billing** and four onshore engagements, and built the business-rules inventory governing policy and underwriting changes on a top-tier insurer platform.

Wipro Technologies

Associate Consultant | Nov 2011 to Apr 2014

- Delivered claims and policy-administration platform work for a major US P&C insurer, and led CRM-upgrade requirements for a major US media client across onshore and offshore teams.

SKILLS

Product: Product strategy, roadmap, OKRs, P&L accountability, AI product management, PRDs, discovery, experimentation, go-to-market, hiring and mentoring PMs

Lending: LOS/LMS, credit decisioning, underwriting automation, risk-based pricing, credit-policy versioning, KYC, bureau and alternate-data integrations (TransUnion, Nova Credit, Plaid, Veriff), disbursement, servicing and collections

AI and ML: RAG, LLM evaluation, red-teaming, grounding and guardrails, agentic / multi-agent design, AI governance and model risk

Platform and APIs: Multi-tenant B2B platform architecture, embeddable widgets, partner provisioning, configurable rules engines, workflow automation

Analytics and delivery: GA4, PostHog, Amplitude, SQL, Tableau, VWO, Jira, Salesforce, Zendesk, Figma; Claude Code, Cursor, Replit, n8n (Decision Studio, RAG eval harness)

EDUCATION AND CERTIFICATIONS

Education

MBA (PGPM), Finance and Business Analytics, Great Lakes Institute of Management | Full-time, Apr 2014 to Apr 2015

B.Tech, Electronics and Instrumentation Engineering, Haldia Institute of Technology | Apr 2007 to Apr 2011

Certifications

AI Product Leadership Certification, Product Faculty | Sep 2026

AI Product Management Certification, Product Faculty | Nov 2025
