

Subhasish Goswami

Product Leader | Lending, Credit Decisioning and Applied AI

Bengaluru, India · subhasishgoswami02@gmail.com · linkedin.com/in/subhasishgoswami · Portfolio: subhasishgoswami.com

Product leader with 14 years across fintech, insurance and B2B platforms, the last seven building MPOWER Financing's lending platform from the ground up: application, underwriting, pricing, payments and servicing. Grew from employee #20 in India to acting product head for International Student Lending and US Domestic Lending from April 2026, reporting to the CTO. Rebuilt credit decisioning, scaled originations about 10x and shipped a production GenAI assistant.

98%

containment on Mira, the AI assistant, across 35,277 users

5 PODs

about 50 professionals, accountable for P&L outcomes

EXPERIENCE

MPOWER Financing

Dec 2019 to Sep 2026

Senior Manager, Product | Bengaluru, India | Reporting to the CTO

Joined before there was an in-house engineering team and built the product and decisioning platform from the ground up. Accountable for P&L outcomes across two lending lines and 5 PODs (about 50 professionals); in 2025 alone the platform disbursed about **\$350M**, roughly 10x its 2021 volume.

Leadership, credit decisioning and risk

- Directed KPIs, roadmap and prioritization across **5 PODs** with **5 Product Managers** reporting directly; chaired quarterly planning and presented the consolidated roadmap to the C-suite for sign-off.
- Cut credit decisions from a 48-hour manual queue to **under 10 seconds**, with **3x throughput** and no added review headcount, by defining the strategy, requirements and configuration model for a rules-based decisioning platform on Salesforce.
- Added **\$43M in incremental funded volume** by productizing risk-based pricing across five tiers with Data Science: approved amounts **up 13 to 17%**, approval conversion **up 10 points**, no cohort degradation, shipped with rollback controls that held terms for applicants already in review.
- Won cross-functional sign-off from 10 functions for a documents-first credit flow worth **\$275K a year** (part of about \$350K a year in planned data and vendor savings), after finding that 40% of pulls in **\$1.41M** of annual bureau spend came before documents were complete.
- Automated the document work underwriters did by hand, wiring identity verification, admission-letter extraction with fuzzy matching for international name variants, and geocoded address checks into the decision path: about **75%** verified automatically, **40%+** with no manual touch.
- Owned deferral automation end to end: about **97%** of deferral decisions automated by the August 2024 readout, and **1,200+ ops hours** saved.

Applied AI

- Shipped Mira, a GenAI borrower-support assistant combining guided flows, approved answers, live API lookups and a RAG-based LLM fallback, reaching **98% containment across 35,277 users** through September 2025.
- Set the grounding rule after red-teaming caught the assistant inventing an executive's name, moved compliance-sensitive topics out of free generation into curated flows, and defined the evaluation model for accuracy, completeness, relevance and bias. Audited answer accuracy rose from **73.8% to 85.9%** in the 2024 launch window.
- Designed a multi-agent servicing system, from requirements to an MVP roadmap: delinquency, contactability, next-best-action and promise-to-pay agents, each with its own data, tools and compliance rules, under a supervisor that decides what escalates to a human.
- Led LLM-based voice-of-customer classification of servicing and collections conversations (intent, sentiment, urgency, hardship, promise-to-pay), validated at **96% agreement** on a 500-record reference set.

Growth, payments and partners

- Took application start-to-submit completion from **70% to 92%** on a funnel of 27,000+ monthly applications and cut drop-off from **16% to 4%** with autofill, persona-based journeys and conditional form shortening, found through funnel analytics, session replays and A/B tests.
- Localized the application for South Asian, Chinese and Spanish-speaking markets, lifting organic-to-application conversion from **8.6% to 19.4%**.
- Opened a cross-border repayment path for borrowers with no US or Canadian bank account, integrating a global payments provider over REST with tokenized handoff, prefilled payment details, real-time status callbacks and automatic servicer reconciliation.
- Built the Loan Partner Wizard, an embeddable eligibility widget partners install with a single script tag, with a published implementation guide, partner provisioning, per-partner branding and layout, and source attribution carried through to funded-loan reporting and referral payouts.

Funding and new markets

- Spearheaded US Domestic Lending after a federal policy change opened a **\$14B** annual gap, including a **\$5 to 6B** no-cosigner graduate segment: adapted underwriting and documentation for US borrowers, launched to a narrow cohort, and cut the document checklist from **35 to 9**.
- When capital markets paused funding, put a reversible credit policy live across both lending lines in **two weeks** through configuration, owned lender-facing reporting across a **\$178M+ pipeline**, and onboarded a second loan servicer.

EARLIER EXPERIENCE

TietoEVRY

Product Owner

Dec 2018 to Dec 2019

Owned B2B asset-management software for a global commercial-real-estate client; turned a manual email-approval process into a funded workflow-automation stream and designed a conversational assistant for first-line queries.

Cognizant Business Consulting

Consultant / Business Analyst

May 2015 to Nov 2018

Won **\$0.42M** in new billing and four client engagements through RFP, proof-of-concept and capability-assessment work for insurance, banking and financial-services clients; built the business-rules inventory for a top-tier insurer's policy and underwriting changes.

Wipro Technologies

Associate Consultant

Nov 2011 to Apr 2014

Delivered claims-processing and policy-administration platform work for a major US property and casualty insurer, and led Siebel CRM upgrade requirements across onshore and offshore teams.

SKILLS

Product	Strategy and roadmaps, P&L, discovery, experimentation, PRDs, OKRs, go-to-market, hiring and coaching PMs
Lending	Credit decisioning, underwriting automation, risk-based pricing, KYC, bureau and alternative data (TransUnion, Nova Credit, Plaid, Veriff), repayments, servicing and collections
Applied AI	RAG, grounding and guardrails, prompt design, LLM evaluation and red-teaming, multi-agent design
Tools	SQL, GA4, PostHog, Amplitude, Tableau, Salesforce, Jira, Figma; Claude Code, Cursor, Codex, Lovable
Builds	Decision Studio (live credit-decisioning demo), CareerOS (agentic job-search system), RAG evaluation harness; an agent chain turning meeting transcripts into PRDs and Jira stories

EDUCATION AND CERTIFICATIONS

MBA (PGPM), Finance and Business Analytics, Great Lakes Institute of Management	Apr 2014 to Apr 2015
B.Tech, Electronics and Instrumentation Engineering, Haldia Institute of Technology	Apr 2007 to Apr 2011
AI Product Leadership Certification, Product Faculty	Sep 2026
AI Product Management Certification, Product Faculty	Nov 2025
