

SUBHASISH GOSWAMI

Senior Product Manager | Fintech, Payments, Credit & Applied AI

Bengaluru, India • +91 97428 25482 • subhasishgoswami02@gmail.com • linkedin.com/in/subhasishgoswami • github.com/subhasishgoswami02 • Portfolio: subhasishgoswami02.github.io

5 PODs	~10x	<10 sec	98%
~50 professionals; P&L accountable	Origination growth achieved across tenure, 2021 to 2025	Decisioning latency, from a 48-hour manual queue	Containment rate on Mira, our production AI assistant

SUMMARY

Product leader with 14 years building and scaling technology platforms, including 6.5 years as acting product head at MPOWER Financing, a regulated fintech lender, accountable for P&L outcomes across two product lines run through 5 PODs (~50 professionals). Took a product from a \$14B market gap to launch, rebuilt underwriting into a configurable decisioning platform, and shipped an AI-powered support assistant and contact-center platform to production. Scaled annual volume ~10x.

SKILLS & EXPERTISE

Product Leadership	Product Vision & Strategy, Roadmap & Prioritization, OKRs & Success Metrics, P&L Accountability, RICE Prioritization, 0-to-1 Launches, Business Acumen, Executive & Cross-Functional Stakeholder Management, PRDs & BRDs, Agile & Scrum, Go-to-Market, Hiring & Mentoring PMs
Technical & Platform	API Contract Design, System Architecture Decisions, Engineering Collaboration, Configurable Business Rules Engine, Workflow Automation, Partner Integrations, Data Schemas, Technical Risk Assessment
Discovery, Analytics & Experimentation	User Research & Discovery, Customer Interviews, A/B Testing & Experimentation (GA4, PostHog, Tableau, FullStory, Pendo), Funnel & Conversion Optimization, Cohort Analysis, Segmentation, NPS & CSAT, SQL
AI, GenAI & Agentic	Agentic AI, AI Agents & Tool Use, GenAI Product Strategy, RAG, LLM Evaluation & Red-Teaming (deepEval, Galileo), Ground Truth & Performance Thresholds, Prompt Engineering, Guardrails & Grounding, Responsible AI, Applied ML, Predictive Modeling, AI Governance, LLMOps
Credit, Identity & Contact-Center Platforms	Credit Decisioning, Underwriting, Risk-Based Pricing, KYC & Identity Verification, Third-Party Credit and Bank Data Integrations (Nova Credit, TransUnion, Plaid, Veriff), Multichannel Contact-Center Platforms (Voice, SMS, WhatsApp)
Design, Delivery & Tools	Rapid MVP Prototyping (Replit, Claude Code, Vercel v0, Lovable), Wireframe & Prototype Review, Design System Alignment, Usability Testing, Customer Journey Mapping, Figma, Salesforce, JIRA, Confluence, Postman, Azure DevOps, Claude, Cursor, n8n

EXPERIENCE

MPOWER FINANCING

Dec 2019 to Present

Senior Manager, Product

- Employee #20 in India. Built the product and decisioning platform solo from 2019, then scaled into accountability for 5 PODs (~50 professionals, including 5 Product Managers reporting directly) at MPOWER. Acting product head for International Student Lending and US Domestic Lending from 2026, accountable for P&L outcomes, reporting directly to the CTO.
- Owned P&L accountability across 5 PODs (~50 professionals) spanning two lending business lines. Translated origination targets into roadmap and execution plans for each POD's PMs, engineers, and QA, and presented product strategy directly to CEO, CFO, and CTO in recurring reviews.
 - Led the product decisions behind ~10x volume growth without proportional spend. Scaled annual origination from ~\$35M (2021) to ~\$350M (2025) across ~25,000 funded loans and ~\$550M cumulatively disbursed, while marketing spend fell about 80%.
 - Spotted a \$14B annual market gap when a federal policy change eliminated a major lending category, leaving a \$5-6B segment of borrowers with no alternative. Co-launched a new product for this profile, customizing underwriting and application logic while reusing the core decisioning and servicing infrastructure, and cut onboarding from 35 documents to 9.
 - Built the product vision, strategy, and PRDs for a configurable decisioning engine processing 27,000+ monthly applications. Redesigned underwriting from a 48-hour manual queue into sub-ten-second automated decisioning, tripling throughput with no added headcount; shipped as a reusable rule engine now adopted by other product teams.

- **Diagnosed and fixed the leading drop-off point in the onboarding funnel, cutting it from 16% to 4% and lifting completion from 70% to 82%.** Partnered with data science to productize applied ML for risk-based pricing, lifting approved amounts 13 to 17% and approval rate about 4 points without loosening credit quality.
- **Built the business case for referral as an underused acquisition channel, then designed and shipped the growth platform.** Referrer dashboard, reward tracking, and gamified engagement, targeting a 20% lift in sharing rate and 15% lift in referee applications.
- **Shipped Mira, a RAG-based AI borrower support assistant, to a 98% containment rate across 35,277 users.** Owned product strategy, evaluation design, and guardrail requirements, and red-teamed hallucination risks before launch.
- **Defined the MVP roadmap for an agentic AI servicing system: specialized agents for delinquency, contactability, next-best-action, and promise-to-pay,** coordinated by a supervisor orchestration agent with tool use and guardrails. Success metrics spanned cure rate, roll rate, contact rate, and manual-effort reduction. Engineering build in planning phase.
- **Led Contact Hub, MPOWER's multichannel contact-center platform used daily by servicing, collections, and recovery teams.** Shipped voice, RoboCall, SMS, and WhatsApp across multiple providers, cutting the time teams needed to initiate borrower outreach. Wrote the PRD for a browser-based click-to-call layer with automatic transcription and AI-generated call summaries and sentiment scoring, reusable across internal consumers; in build.

EARLIER EXPERIENCE

Full-time MBA at Great Lakes Institute of Management (2014 to 2015) sits between the Wipro and Cognizant roles below, closing the timeline gap.

TIETOEVRY, Product Owner Dec 2018 to Dec 2019
Owned product delivery for a workflow-automation program, led requirements and Agile delivery; shipped an Azure Logic Apps proof of concept replacing manual email-approval workflows; designed a virtual assistant on AWS Lex.

COGNIZANT BUSINESS CONSULTING, Consultant / Business Analyst May 2015 to Nov 2018
Led proof-of-concept and solution work across automation, AI, and emerging tech for banking and financial-services clients; won four new client engagements through proposal and solution work.

WIPRO TECHNOLOGIES, Associate Consultant Nov 2011 to Apr 2014
Delivered claims-processing and policy-administration platform work for major US insurance clients. Separately supported business process configuration, Siebel CRM workflows, and cloud migration for additional enterprise clients in media & communications and retail, including a retail website-purchase flow.
