

Subhasish Goswami

Product Leader | Lending, Credit Decisioning and Applied AI

Bengaluru, India · subhasishgoswami02@gmail.com · linkedin.com/in/subhasishgoswami · Portfolio: subhasishgoswami.com

Product leader with 14 years across fintech, insurance and B2B platforms, the last seven building MPOWER Financing's lending and decisioning platform from the ground up. Grew from employee #20 in India to acting product head for International Student Lending and US Domestic Lending from April 2026. Rebuilt credit decisioning, scaled originations about 10x and shipped a production GenAI assistant.

about 50 professionals, accountable for P&L outcomes

EXPERIENCE

MPOWER Financing

Dec 2019 to Sep 2026

Senior Manager, Product | Bengaluru, India | Reporting to the CTO

Joined as employee #20 in India, before there was an in-house engineering team, and built the product and decisioning platform from the ground up. Accountable for P&L outcomes across two lending lines and 5 PODs (about 50 professionals); the platform disbursed about **\$550M** across **25,000+** funded loans, with originations up about 10x from 2021 to 2025.

LEADERSHIP, CREDIT DECISIONING AND RISK

- Directed KPIs, roadmap and prioritization across **5 PODs** with **5 Product Managers** reporting directly; chaired quarterly planning and presented the consolidated roadmap to the CEO, CFO and CTO for sign-off.
- Cut credit decisions from a 48-hour manual queue to **under 10 seconds**, with **3x throughput** and no added review headcount, by defining the strategy, requirements and configuration model for a rules-based decisioning platform on Salesforce; **56.5%** of submitted applicants received a real-time automated decision.
- Productized risk-based pricing across five tiers with Data Science: approved amounts **up 13 to 17%**, approval conversion **up 10 points**, no cohort degradation, and **\$43M in incremental funded volume**, shipped with rollback controls.
- Won sign-off from 10 functions for a documents-first credit flow worth **\$275K a year**, after finding that 40% of pulls in **\$1.41M** of annual bureau spend happened before documents were complete.
- Cut single-bank funding risk by onboarding a second originating bank behind a lender-routing engine (round-robin, capacity and concentration limits), with sign-off across **11 functions**.
- Owned deferral automation end to end: about **97% of decisions automated**, **1,200+ ops hours** saved.

APPLIED AI

- Shipped Mira, an AI borrower-support assistant combining guided flows, approved answers, live API lookups and a RAG-based LLM fallback, reaching **98% containment across 35,277 users** through September 2025.
- Set the grounding rule after red-teaming caught the assistant inventing an executive's name, and defined the evaluation model scoring LLM answers for accuracy, completeness, relevance and bias. Audited answer accuracy rose from **73.8% to 85.9%** in the 2024 launch window.
- Led LLM-based voice-of-customer classification of servicing and collections conversations (intent, sentiment, hardship, promise-to-pay), validated at **96% agreement** on a 500-record reference set.
- Defined requirements and a phased MVP roadmap for a multi-agent servicing system: delinquency, contactability, next-best-action and promise-to-pay agents, each with its own data and compliance rules, under a supervisor that decides what goes to a human.

GROWTH, PAYMENTS AND PARTNERS

- Took application start-to-submit completion from **70% to 92%** and cut drop-off from **16% to 4%** with autofill, persona-based journeys and conditional form shortening, found through SQL, GA4, PostHog, session replays and A/B tests.

- Localized for South Asian, Chinese and Spanish markets, lifting organic-to-application conversion from **8.6% to 19.4%**.
- Made borrowers **2 to 3x more contactable** by leading a unified borrower view that collects up to 9 identifiers per borrower and resolves location from declared, observed, validated and predicted signals.
- Owned the configuration and admin APIs behind a multi-tenant, embeddable B2B partner platform, so new partners went live on one product experience through self-serve configuration.
- Led product requirements and a phased rollout moving Canadian loan repayments to a new processor: consent, bank-account changes, weekly payment files and auto-deactivation after three failed debits, built to Payments Canada Rule H1.

NEW MARKETS

- Spearheaded US Domestic Lending after a federal policy change left a **\$5 to 6B** no-cosigner graduate segment without options: launched lean to a narrow cohort and built US-borrower underwriting and documentation paths on the existing platform, cutting required documents from **35 to 9**.
- When capital markets paused funding, put a reversible credit policy live in **two weeks** through configuration, and owned lender-facing reporting across a **\$178M+ pipeline**.

EARLIER EXPERIENCE

TietoEVRY
 Product Owner

Dec 2018 to Dec 2019

Owned B2B asset-management software for a global commercial-real-estate client; turned a manual email-approval process into a funded workflow-automation stream and designed a conversational assistant for first-line queries.

Cognizant Business Consulting
 Consultant / Business Analyst

May 2015 to Nov 2018

Won **\$0.42M** in new billing and four client engagements through RFP, proof-of-concept and capability-assessment work for insurance, banking and financial-services clients; built the business-rules inventory for a top-tier insurer's policy and underwriting changes.

Wipro Technologies
 Associate Consultant

Nov 2011 to Apr 2014

Delivered claims-processing and policy-administration platform work for a major US property and casualty insurer, and led Siebel CRM upgrade requirements across onshore and offshore teams.

SKILLS

Product	Strategy and roadmaps, P&L accountability, discovery, experimentation, PRDs, OKRs, go-to-market, hiring and coaching PMs
Lending	Credit decisioning, underwriting automation, risk-based pricing, credit-policy versioning, KYC, bureau and alternative data (TransUnion, Nova Credit, Plaid, Veriff), repayments, servicing and collections
Applied AI	RAG, grounding and guardrails, prompt design, LLM evaluation and red-teaming, multi-agent design, human-in-the-loop controls
Tools	SQL, GA4, PostHog, Amplitude, Tableau, Salesforce, Jira, Confluence, Figma; Claude Code, Cursor, Codex, Lovable, Replit
Builds	Decision Studio (live credit-decisioning demo), CareerOS (agentic job-search system), RAG evaluation harness; daily product work on an agent chain (transcripts to PRDs to Jira stories, Slack back into the backlog), human-approved at every key step

EDUCATION AND CERTIFICATIONS

MBA (PGPM), Finance and Business Analytics, Great Lakes Institute of Management	Apr 2014 to Apr 2015
B.Tech, Electronics and Instrumentation Engineering, Haldia Institute of Technology	Apr 2007 to Apr 2011
AI Product Leadership Certification, Product Faculty	Sep 2026
AI Product Management Certification, Product Faculty	Nov 2025
