

Subhasish Goswami

Product Leader | Platform Strategy, Regulated Delivery and Applied AI

Bengaluru, India | +91 97428 25482 | subhasishgoswami02@gmail.com | linkedin.com/in/subhasishgoswami | subhasishgoswami02.github.io

SUMMARY

Product leader accountable for two lending product lines and their P&L, delivered through 5 teams and about 50 people across product, engineering and QA, with five Product Managers reporting in. Joined MPOWER Financing as employee #20 in India with no engineering team in place, built the decisioning platform, and scaled it roughly 10x to about \$350M in annual originations. Held the portfolio through a capital-markets funding pause without losing a lender relationship, and launched a new product line into a \$5-6B gap while it was happening.

~10x origination growth, 2021 to 2025 | 5 teams, about 50 people | \$178M+ pipeline reported through a funding pause | \$10M approved in two months on a new product line

EXPERIENCE

MPOWER Financing

Senior Manager, Product | Bengaluru, India | Dec 2019 to Present

Reporting to the CTO | Five Product Managers, 5 teams, about 50 people across product, engineering and QA | ~\$350M annual originations

Joined MPOWER as employee #20 in India and built the product and decisioning platform from the ground up. Promoted four times to Senior Manager, Product. Now acting product head for International Student Lending and US Domestic Lending.

ORGANIZATION AND LEADERSHIP

- Accountable for **5 teams**, about 50 people across product, engineering and QA, delivering both lending product lines, with the five Product Managers running credit, partners, payments and servicing reporting in. Chaired org-wide quarterly planning and presented the consolidated roadmap to the CEO, CFO and CTO for sign-off.
- Supported ~10x origination growth, from about \$35M in 2021 to about \$350M in 2025 across roughly 25,000 funded loans, by scaling decisioning capacity, expanding eligibility and improving conversion.

STRATEGY AND NEW MARKETS

- Launched a new graduate-lending product after a federal policy change left a \$5-6B segment without options, reaching **\$10M** in approved applications within two months. Scoped the first release to a narrow cohort, reused existing underwriting and servicing rather than rebuilding, and cut required documents from 35 to 9.
- Replaced blanket country and school eligibility with program-level filtering across 500+ institutions, opening **\$450M+** of new application demand in two months with two-thirds of it landing in the strongest risk grades.
- Converted a capital-markets funding pause into a live, reversible credit policy in **two weeks**, tightening eligibility across both lending lines entirely through configuration, and owned lender-facing reporting across a \$178M+ pipeline as the pause widened.
- Brought a second originating bank onto the platform to cut single-bank funding concentration, designing the routing engine that allocates applications at creation and coordinating sign-off across **11 functions** including compliance and capital markets.

PLATFORM, AI AND GOVERNANCE

- Rebuilt underwriting as a configurable rules platform inside Salesforce, the system of record for the loan lifecycle, taking automated credit decisions from a 48-hour manual queue to **under 10 seconds** and tripling throughput with no added review headcount. The same engine cut the time to launch a new lending product from months to days.
- Shipped an **AI borrower-support assistant** that answers 98% of support questions without a human across 35,277 users, while support ticket volume fell 65% year on year and audited answer accuracy moved from 73.8% to 85.9% by pulling compliance-sensitive topics out of free generation and into curated flows.
- Owned the governance layer alongside the product: GDPR infrastructure including data processing addendums and vendor privacy terms, an enterprise AI tool policy written to **SOC 2 Type II** and GDPR requirements, and remediation of critical penetration-test findings.

EARLIER EXPERIENCE

TietoEVRY

Product Owner | Dec 2018 to Dec 2019

- Owned product requirements for B2B asset-management software for a global commercial-real-estate client, running discovery with business stakeholders through to prioritized backlogs and acceptance criteria.
- Found a manual email-approval workflow costing the client days per request, built the case for automating it, and turned the proof of concept into a funded workstream that **grew the delivery team by three**. Also designed a conversational assistant for first-line query handling.

Cognizant Business Consulting

Consultant / Business Analyst | May 2015 to Nov 2018

- Consulting arm of Cognizant: built solution offerings and led RFP and RFI responses, proofs of concept and capability-maturity assessments for insurance, banking and financial-services clients.
- Won **\$0.42M in new billing** and four onshore engagements through that work, and built the business-rules inventory that governed policy and underwriting rule changes on a top-tier insurer's platform re-engineering.

Wipro Technologies

Associate Consultant | Nov 2011 to Apr 2014

- Delivered claims-processing and policy-administration platform work for a major US property and casualty insurer, diagnosing production defects within SLA and mentoring new joiners onto the account.
- Led requirements and functional-impact analysis for a CRM upgrade at a major US media client, coordinating onshore and offshore teams from requirements through testing.

SKILLS

Product: Product strategy, roadmap and prioritization, OKRs, P&L accountability, AI product management, PRDs, discovery and customer interviews, experimentation, go-to-market, hiring and mentoring PMs

Lending: Acquisition and funnel conversion, loan origination (LOS), credit decisioning, underwriting automation, risk-based pricing, credit-policy versioning, KYC and identity verification, bureau and alternate-data integrations (TransUnion, Nova Credit, Plaid, Veriff, Hyperscience), disbursement, direct-debit mandates, loan management (LMS), servicing and collections

Platform and APIs: API product design, embeddable widgets and partner SDKs, versioned external integration docs, partner onboarding and provisioning, source attribution, configurable rules engines, workflow automation, data contracts, architecture trade-offs

AI and ML: RAG, LLM evaluation and monitoring, red-teaming, grounding and guardrails, agentic workflow design, applied ML, AI governance and model risk

Analytics: Product analytics (GA4, PostHog, Amplitude, FullStory), experimentation (VWO), BI and data (SQL, Redshift, Tableau)

Governance: GDPR and data processing addendums, SOC 2 Type II, AI governance and model risk, penetration-test remediation, audit readiness, credit-policy governance

Delivery and design: Jira, Confluence, Azure DevOps, Rally, Salesforce, Zendesk, Figma, Miro, draw.io, Postman

AI prototyping: Claude Code, Cursor, Replit, v0, n8n; shipped a RAG evaluation harness, a multi-agent resume reviewer and CareerOS, an agentic job-search system, hands-on

EDUCATION AND CERTIFICATIONS

Education

MBA (PGPM), Finance and Business Analytics, Great Lakes Institute of Management | Full-time, Apr 2014 to Apr 2015

B.Tech, Electronics and Instrumentation Engineering, Haldia Institute of Technology | Apr 2007 to Apr 2011

Certifications

AI Product Leadership Certification, Product Faculty | Sep 2026

AI Product Management Certification, Product Faculty | Nov 2025
